

This view allows for a user to select a day that they would like to view.

From here the user can view the appointments and if they are available.

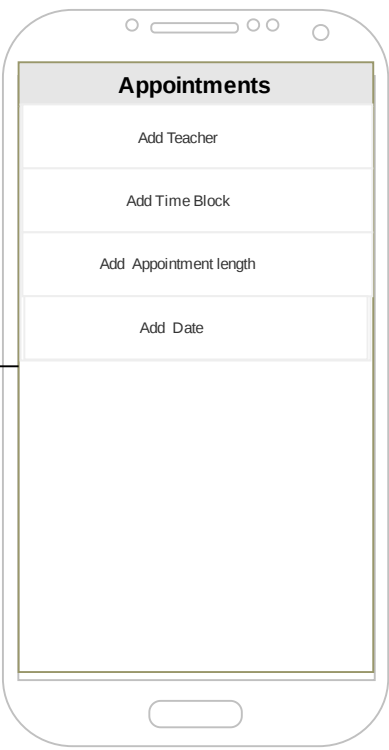

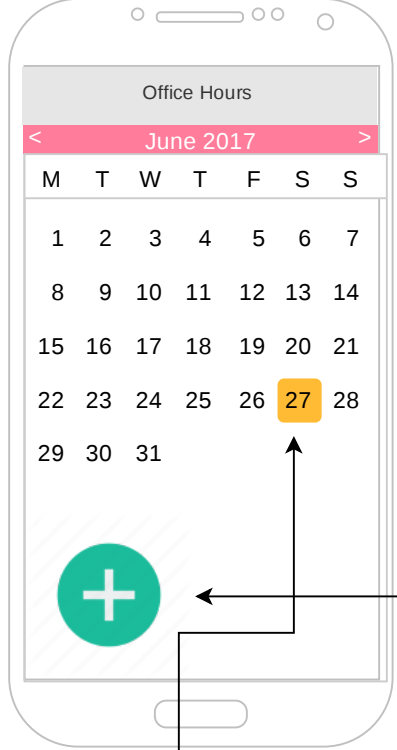

If the appointment is available then the user can select it and confirm that they want to book the appointment

A Teacher has the all the UI that a normal user has, but can also add appointments for the students to choose.

Once the Teacher selects the plus floating action button they can put the required fields to make an appointment.

### Teacher Permissions

A Teacher can also view appointments for a day that they have selected on the calendar.
